

Fuji Oil reinforced FCC Unit capacity

March 31, 2008

Construction of No.2 FCC (Fluid Catalytic Cracking) unit of 18,000 BPSD was completed at the end of March 2008 at Sodegaura refinery as scheduled.

Capacity of FCC unit was doubled to 36,000 BPSD at the refinery. The expansion project was a part of countermeasures planned to cope with decreasing demand for heavy fuel oil.
